

The Business Case: Work-related road safety - *'Show me the data'*

- Dr Will Murray
 - will.murray@virtualriskmanager.net

WIPE approach

Why: Going beyond compliance?

- Societal reasons *:
 - Work-related driving = 25-30% of road deaths
 - Vehicle incidents = 40-50% of worker fatalities
 - Double these numbers if commuting included
- Legal compliance:
 - OHS, transport and corporate regulations
 - Negligent entrustment
- Business:
 - Brand, CSR, reputation, loss of key workers, link to fuel efficiency
- Costs:
 - Safety and fuel have significant impact on costs
- **Email for business case & cost model templates**

Country (NK = not known)	% of road fatalities excluding commuting	% of road fatalities including commuting	% of occupational fatalities excluding commuting	% of occupational fatalities including commuting
Australia (Queensland)	24	NK	46	NK

Summary

- Effective work-related road safety:
 - WIPE model
 - Business case
 - Data led status review
 - Long term sustained Virtuous Circle →
 - Work-related road safety can be massive conduit for community road safety & organisational success
